

Maxillaria Deppii.

No. 1612.

MAXILLARIA DEPPIL.

Class.	Order.
<i>GYNANDRIA</i>	<i>MONANDRIA.</i>

.....

We received this beautiful plant in November, 1828, from Mr. Deppe, who collected it near Xalapa, in New Spain. It flowered in June, 1830. It requires the constant protection of the stove, and should be potted in vegetable earth. We have not as yet had it long enough to obtain any increase, but it will no doubt admit of occasional separation at the root for that purpose.
